QUANTRON Relaunches after Insolvency – Sustainable, Strengthened, and Future-Oriented

Gersthofen, April 1st, 2025 – QUANTRON, a leading innovator in zero-emission transport solutions for commercial vehicles, has emerged stronger from its insolvency proceedings and is charting a new course with renewed energy and a focused strategy. The company is committed to offering suitable solutions that deliver both ecological and economic value to its customers.

Following a challenging period, a sustainable foundation for QUANTRON's future has been secured. Thanks to targeted efficiency measures, robust cost management, and the strong support of employees and partners, QUANTRON is now positioned to enter a new chapter – one defined by sustainability, stability, and growth.

“We have laid the foundation to make QUANTRON resilient, profitable, and healthy in the long term – and at the same time, we remain fully committed to advancing our vision of transforming the transportation sector,” says Andreas Haller, founder and owner of QUANTRON.

The journey continues – with full force. QUANTRON remains a symbol of transformation and forward-thinking in the realm of sustainable passenger and freight transport. Despite the challenges of recent months, the company has used this time for critical reflection, process optimization, and strategic realignment. With innovative solutions, a clear strategic direction, and a strengthened team, QUANTRON aims to further solidify its position as a pioneer in zero-emission transportation. The focus is now on sustainable growth, global partnerships, and the continuous development of technology. QUANTRON stands firm behind its mission!

“Our most important asset is our people,” Haller emphasizes. “Their tireless commitment, perseverance, and belief in our vision were key throughout this phase. We owe them our deepest gratitude – as well as to our loyal customers, reliable partners, and dedicated suppliers who supported us with unwavering trust. Their loyalty and valuable collaboration have been, and continue to be, a vital factor in our success.”

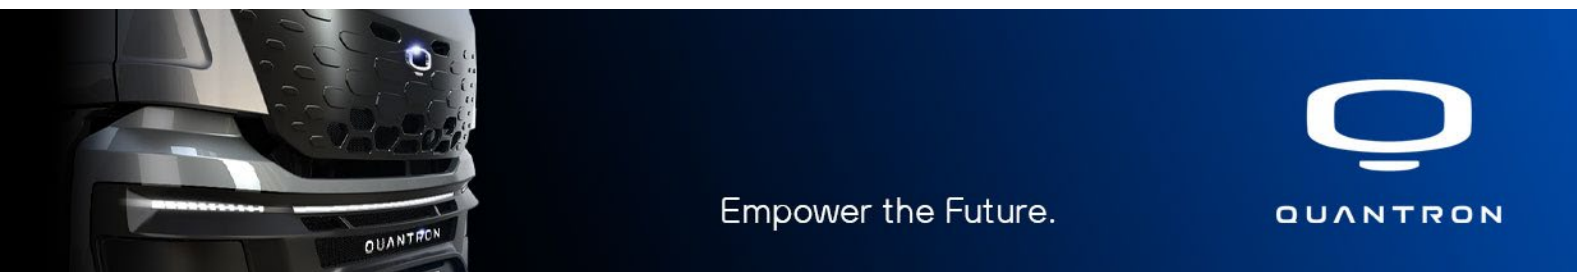

QUANTRON will provide further updates in the coming weeks and is planning a press conference in Q2 2025 to present details of its future strategy and new projects.
